

CHANGES DUE TO THE COVID-19 (December Update):

ESC Technical Committee have decided that due to the Covid-19 pandemic to vary the competition rules as follows:

1. The feature added to the results manager which gives you the possibility to choose which month you want to register results for will be extended **for** another month. **After that, results shot in January then can be registered for November and December, but only one result per competitor as before.** Effectively, the competition months have not been changed, but registration has been made more flexible.
2. We will in this way fight the corona pandemic and allow competitors to participate in smaller groups and/or individually to reduce risk of infection. This means that the rule regarding five competitors from at least three clubs will be ineffective until further notice.
3. To be clear SCATT/NOPTTEL or similar electronic equipment are not allowed to be used in this competition.
4. These changes take place immediately.
